Adjustable canvas backrest

# ZEN

**Available in paediatric or adult sizes**

The Zen backrest adapts to all tubular frame wheelchairs. It enables patients to maintain a greater autonomy while fostering a posture that improves their mobility. The wheelchair can be folded without any extra manipulation of the backrest. This soft backrest with adjustable tension is made of 1 ½ in. polyurethane and viscose comfort foam and can be fitted with a choice of thoracic supports. These supports enable backrest adjustments to fit the unique postural needs of each patient.

**Soft canvas backrest**  
(Std) Multidirectional adjustable tension.

**Headrest** (optional)  
Multi-jointed support to allow for multidirectional adjustments.

**Thoracic supports**  
(optional) Choice of four supports, in adult and paediatric versions.

**Breastplate** (optional)  
Installation of breastplate with the addition of a backrest reinforcement bar.

**Support anchors**  
(optional) Mechanism enables adjustment to patient's size.

**Reinforcement bar**  
(optional) To stabilize wheelchair frame and attach optional breastplate and headrest.

**W** Width

12 to 22 inches      305 to 559 mm

**H** Height

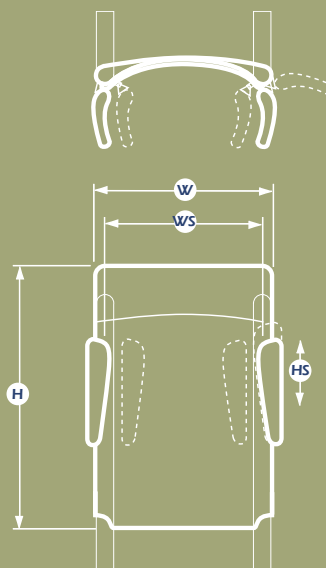

Short  
12 to 15 inches      305 to 381 mm  
Medium  
15 to 18 inches      381 to 457 mm  
High  
18 to 21 inches      457 to 533 mm

**WS** Width between lateral thoracic supports

0 to -3 inches      0 to -76 mm  
Each thoracic support is adjustable 3 inches toward the interior.

**HS** Height adjustment of lateral thoracic supports

Adult                      -114 to +114 mm  
-4½ to +4½ inches  
Kid                         -38 to +38 mm  
-1½ to +1½ inches

## Entirely adjustable

The range of adjustments of the Zen canvas backrest straps enables optimisation of each patient's posture and comfort.

The addition of thoracic supports enables extra hold of trunk. Available with fixed or detachable anchoring system.
